Molecular and Cellular Biochemistry **149/150**: 323–325, 1995.

Index to Volumes 149 and 150

Adie EJ, *see* Milligan G *et al.*
Aitken A, Howell S, Jones D, Madrazo J, Martin H, Patel Y and Robinson K: Post-translationally modified 14-3-3 isoforms and inhibition of protein kinase C 41–49
Anand-Srivastava MB, *see* Marcil J *et al.*

Balendiran K, Tan Y, Sharma RK and Murthy KHM: Preliminary crystallization studies of calmodulin-dependent protein phosphatase (calcineurin) from bovine brain 127–130
Barnes JA and Gomes AV: PEST sequences in calmodulin-binding proteins 17–27
Barnes JA, *see* Taketa S *et al.*
Besch HR, Jr, *see* Bidasee KR *et al.*
Bharadwaj L and Prasad K: Mediation of H_2O_2-induced vascular relaxation by endothelium-derived relaxing factor 267–270
Bidasee KR, Besch HR, Jr, Gerzon K and Humerickhouse RA: Activation and deactivation of sarcoplasmic reticulum calcium release channels: Molecular dissection of mechanisms via novel semi-synthetic ryanoids 145–159
Brown GR, *see* Rudge SA *et al.*
Carter TC and Coore HG: Effects of pyruvate on pyruvate dehydrogenase kinase of rat heart 71–75

Cherry J, *see* Davis RL *et al.*
Cockburn BN and Coore HG: Starvation reduces pyruvate dehydrogenase phosphate phosphatase activity in rat kidney 131–136
Collard KJ: On the role of nitric oxide as a cellular messenger in brain 249–256
Coore HG, *see* Carter TC *et al.*
Coore HG, *see* Cockburn BN *et al.*
Cowburn RF, *see* Fowler CJ *et al.*

Dauwalder B, *see* Davis RL *et al.*
Davis RL, Cherry J, Dauwalder B, Han P-L and Skoulakis E: The cyclic AMP system and *Drosophila* learning 271–278
Denton RM, *see* Nichols BJ

Edwards HC and Moss SE: Functional and genetic analysis of annexin VI 293–299

Fagnou DD and Tuchek JM: The biochemistry of learning and memory 279–286
Fowler CJ, Cowburn RF, Garlind A, Winblad B and O'Neill C: Disturbances in signal transduction mechanisms in Alzheimer's disease 287–292

Garlind A, *see* Fowler CJ *et al.*
Gerzon K, *see* Bidasee KR *et al.*
Gomes AV, *see* Barnes JA

Han P-L, *see* Davis RL *et al.*
Harrell WB, *see* Mittal CK *et al.*

Hollenberg MD: Tyrosine kinase-mediated signal transduction pathways and the actions of polypeptide growth factors and G-protein-coupled agonists in smooth muscle 77–85
Holtzclaw LA, *see* Yagodin S *et al.*
Howell S, *see* Aitken A *et al.*
Huang Q-Q, *see* Qi Z *et al.*
Hughes PJ, *see* Rudge SA *et al.*
Humerickhouse RA, Jr, *see* Bidasee KR *et al.*

Iqbal Z: Excitatory amino acid receptor-mediated neuronal signal transduction: Modulation by polyamines and calcium 233–240

Jones D, *see* Aitken A *et al.*

Kerc E, *see* Pato MD *et al.*
Khandelwal RL, *see* Pugazhenthi S
Kim G-D, *see* Milligan G *et al.*
Krik CJ, *see* Rudge SA *et al.*

Lee K-Y, *see* Qi Z *et al.*
Lye SJ, *see* Pato MD *et al.*

Madrazo J, *see* Aitken A *et al.*
Magnuson BA, *see* Raju RVS *et al.*
Marala RB and Mustafa SJ: Modulation of protein kinase C by adenosine: Involvement of adenosine A_1 receptor-pertussis toxin sensitive nucleotide binding protein system 51–58
Marcil J and Anand-Srivastava MB: Defective ANF-R_2/ANP-C receptor-mediated signalling in hypertension 223–231
Martin H, *see* Aitken A *et al.*
Matsuura I, *see* Qi Z *et al.*
Mehta CS, *see* Mittal CK *et al.*
Meij JTA, *see* Williams S *et al.*
Michell RJ, *see* Rudge SA *et al.*
Milligan G, Kim G-D, Mullaney I and Adie EJ: Regulation of cellular $G_s\alpha$ levels and basal adenylyl cyclase activity by expression of the β2-adrenoceptor in neuroblastoma cell lines 213–216
Mittal CK, Harrell WB and Mehta CS: Interaction of heavy metal toxicants with brain constitutive nitric oxide synthase 263–265
Mittal CK: Oxygen-radical/nitric oxide mediate calcium-dependent hormone action on cyclic GMP system: A novel concept in signal transduction mechanisms 257–262
Moss SE, *see* Edwards HC
Mullaney I, *see* Milligan G *et al.*
Murthy KHM, *see* Balendiran K *et al.*
Mustafa SJ, *see* Marala RB

Nichols BJ and Denton RM: Towards the molecular basis for the regulation of mitochondrial dehydrogenases by calcium ions 203–212

O'Neill C, *see* Fowler CJ *et al.*

Panagia V, *see* Williams S *et al.*
Patel Y, *see* Aitken A *et al.*

Pato MD, Kerc E and Lye SJ: Phosphorylation and partial sequence of pregnant sheep myometrium myosin light chain kinase 59–69
Philibert K and Zwiers H: Evidence for multisite ADP-ribosylation of neuronal phosphoprotein B-50/GAP-43 183–190
Prasad K, *see* Bharadwaj L
Pugazhenthi S and Khandelwal RL: Regulation of glycogen synthase activation in isolated hepatocytes 95–101

Qi Z, Tang D, Matsuura I, Lee K-Y, Zhu X, Huang Q-Q and Wang JH: Regulatory properties of neuronal cdc2-like kinase 35–39

Raju RVS, Magnuson BA and Sharma RK: Mammalian myristoyl CoA: Protein N-myristoyltransferase 191–202
Robinson K, *see* Aitken A *et al.*
Rudge SA, Hughes PJ, Brown GR, Michell RH and Kirk CJ: Inositol lipid-mediated signalling in response to endothelin and ATP in the mammalian testis 161–174
Russell JT, *see* Yagodin S *et al.*

Sharma RK, *see* Balendiran K *et al.*
Sharma RK, *see* Raju RVS *et al.*
Sharma RK, *see* Taketa S *et al.*
Sharma RK: Signal transduction: Regulation of cAMP concentration in cardiac muscle by calmodulin-dependent cyclic nucleotide phosphodiesterase 241–247
Singh J and Wisdom DM: Second messenger role of magnesium in pancreatic acinar cells of the rat 175–182
Skoulakis E, *see* Davis RL *et al.*
Srivastava AK: Protein tyrosine phosphorylation in cardiovascular system 87–94
Sulakhe PV and Vo XT: Regulation of phospholamban and troponin-I phosphorylation in the intact rat cardiomyocytes by adrenergic and cholinergic stimuli: Roles of cyclic nucleotides, calcium, protein kinases and phophatases and depolarization 103–126

Taketa S, Barnes JA, Ubhi M and Sharma RK: High molecular weight calmodulin-binding protein is phosphorylated by calmodulin-dependent protein kinase VI from bovine cardiac muscle 29–34
Tan Y, *see* Balendiran K *et al.*
Tang D, *see* Qi Z *et al.*
Tuchek JM, *see* Fagnou DD

Ubhi M, *see* Taketa S *et al.*

Vo XT, *see* Sulakhe PV
Vogel HJ and Zhang M: Protein engineering and NMR studies of calmodulin 3–15

Waisman DM: Annexin II tetramer: Structure and function 301–322
Wang JH, *see* Qi Z *et al.*
Williams S, Meij JTA and Panagia V: Membrane phospholipids and adrenergic receptor function 217–221
Winblad B, *see* Fowler CJ *et al.*
Wisdom DM, *see* Singh J

Yagodin S, Holtzclaw LA and Russell JT: Subcellular calcium oscillators and calcium influx support agonist-induced calcium waves in cultured astrocytes 137–144

Zhang M, *see* Vogel HJ
Zhu X, *see* Qi Z *et al.*
Zwiers H, *see* Philibert K
